March 12, 2007

I have been an interior designer in the metropolitan Atlanta area for 37 years and until a year and a half ago didn't think a good contractor existed that would listen to the homeowners and designers when planning projects for their homes.

My lucky day was the day I met Cayenne Barnes with Professional Interiors. Professional Interiors excellent customer service, attention to detail, collaboration on design, responsiveness to problems and issues have been everything I was looking for in a contracting firm.

I now look forward to construction projects and know that my clients will be extremely happy with the results of any project Professional Interiors handles.

In the past, homeowner's were relieved to have projects completed and really felt the construction hassle wasn't worth it. Homeowner's now hate to see the professional Interiors crew complete the job and leave. What a pleasure!
